ANALYTICS SOLUTIONS LEAD

Hands-on data and analytics solutions leader with more than a decade of experience taking ambiguous business problems from stakeholder discovery through technical delivery, adoption, and measurable impact. Combines advanced SQL, BI, automation, data-product ownership, and hands-on dbt project experience with executive communication and mentoring. Most effective in roles that pair building with cross-functional technical leadership.

CORE SKILLS

Solutions Leadership: Stakeholder discovery, requirements translation, solution design, executive communication, prioritization, mentoring, cross-functional delivery

Data & BI: Advanced SQL, Snowflake, Redshift, Oracle, Tableau, Power BI, Excel, dbt Core, DuckDB, dimensional modeling

Products & Automation: Python, JavaScript/JSX, Node.js, APIs, reporting automation, self-service analytics, data quality, deployment and monitoring

PROFESSIONAL EXPERIENCE

FIS — Senior Business Analyst II

August 2022–Present

- Serve as reporting solution leader across Loyalty, Prepaid, and Smart Basket, owning implementation and progress communication while assigning, reviewing, and mentoring work for two junior employees.
- Translate loosely defined needs across business and technical teams into prioritized dashboards, self-service tools, analytical workflows, and requirements for new data products.
- Own or support approximately eight dashboards used by roughly 200 stakeholders; automation saves an estimated 100 hours per week and reduced standard reporting turnaround from approximately 15 business days to 2.
- Lead end-to-end financial modeling for deals estimated to generate more than \$10 million in annual revenue, from sourcing and validating data through presenting pricing recommendations to executive leadership.
- Managed the Loyalty reporting transition from Oracle to Snowflake and Tableau and use advanced SQL in Snowflake and Redshift to deliver trusted analysis across a Fortune 500 environment.

FIS — Data Analyst

August 2018–August 2022

- Built recurring and ad hoc Tableau and Excel reporting, automated data tasks, validated results, and created self-service analytical solutions supporting more than 3,000 financial institutions.

4th Source — Application Support Analyst

December 2014–August 2018

- Solved complex data and application problems with SQL, PL/SQL, Python, and Bash/Unix and translated operational data into Tableau dashboards and executive reporting.

SELECTED DATA PRODUCTS

QDB Analytics Engineering Project — dbt & DuckDB

2026

- Built a seven-model, documented dbt project that turns read-only operational snapshots into reusable financial-health, company-dimension, and price-performance marts with 56 configured data tests and Git-based development.

Quantum Market Cap — Independent Builder and Operator

2026–Present

- Own the complete lifecycle of a market-data platform, from problem selection and source-aware ingestion through modeling, APIs, user experience, deployment, monitoring, and ongoing data maintenance.

EDUCATION & CREDENTIAL

B.S., Information Technology — Western Governors University, 2017 | **Oracle Database SQL Certified Associate**
